THE POSSESSION EXPERIMENT

FEATURE FILM

When a college student performs an experiment during a class project, what he finds proves to be more than he can handle.

Brandon has always been drawn to the supernatural. When he is asked to pick a topic to study and base a final project around on for his world theology class, Brandon decides to explore the dark world of exorcisms. Teamed up with a classmate, the two are lead to investigate a multiple homicide / suicide that eventually is discovered to have been an exorcism gone horribly wrong. Brandon quickly becomes obsessed with the event, and in a strange turn of events, decides the only way to research this topic is to undergo it himself. He creates a GoFundMe.com campaign, and despite a huge public outcry, raises a large amount of money so that he can be monitored medically after he conjures and invites an actual demon to possess him. Brandon quickly realizes that though he was incredibly intrigued by it, he has certainly taken on more than he can handle.
